

2E-EDUC 3 – Principles and Methods of Teaching Term 1- AY 2026-2027

My e-Portfolio on Course Outputs, Experiential Learning Activities and Self-Assessment

Name of CTP Student/Developer: Rose Marianne Louis M. Gardoce

Date Submitted: September 26, 2026

An e-portfolio is an electronic format for students to record their work, goals, and achievements. reflect on their learning. share their learning and receive feedback and feedforward. An academic e-portfolio is a digital collection created by students of their course-related work, like essays, worksheets, posters, photographs, videos, presentations, and artwork. Portfolio assessments can build students' self-confidence and "self-appraisal" skills through the opportunity they provide for students to reflect on and celebrate their accomplishments.

Directions:

1. Create your e-portfolio using Google sites, Wix or other platforms for your CTP Learning Journey experiences via Experiential Learning Activities and course outputs.
2. You may use existing e-portfolio from other CTP courses previously created. You just provide separate folders intended for 2E-EDUC 3 contents.
3. Accomplish the Reflections, Experiential Learning Activities and the Self-assessment rubric below.

Wix:

Part I. Reflections on My e-Portfolio

1. How do I feel about creating my e-portfolio? What is it in my e-portfolio that I am proud of?

Creating my e-portfolio was a bit challenging at first, especially because I had to organize my different outputs and experiences in one place. But as I worked on it, I realized that it was also a good opportunity to look back on my learning journey. I am proud that I was able to put together my experiences, outputs, and reflections in a way that represents who I am as an educator. I am also happy with the overall look of my portfolio because I wanted it to be simple, clean, and professional while still reflecting my personality.

2. What do I think I have gained in terms of knowledge of course contents, pedagogical skills, technological skills, and other skills while creating my e-portfolio?

It helped me understand the course concepts better because I had to look back at the activities and think about what I actually learned from them. It also helped me improve my skills in organizing information, reflecting on my experiences, and presenting my work. On the technology side, I became more comfortable using digital platforms and different tools to create and organize content. More than just completing the portfolio, I learned how important it is to take time to reflect on my experiences and see what I can still improve as a teacher.

3. As a future or practicing teacher, what benefits /purposes /advantages do I get from creating an e-portfolio?

In my opinion, an e-portfolio is useful because it gives me a place where I can keep track of my growth as a teacher. Instead of just keeping my outputs as requirements, I can look back at them and see how my ideas and teaching practices have changed over time. It can also serve as evidence of the things I have learned and accomplished. As I continue teaching and attending trainings, I can keep adding to it and use it as a record of my professional development.

Part II. Reflections on Experiential Learning Activities

Experiential Learning Activities	Competencies/ Skills Developed/Acquired	Challenges/Issues Encountered	Suggestions /Recommendations for Improvement
1. Classroom Teaching Observations at PNU ITL or from other educational	The classroom observation helped me become more aware of what happens during an actual lesson. I was able to observe how the teacher presents the lesson, interacts with	One challenge was knowing what to focus on during the observation. There were many things happening at the same time, so I had to pay attention not only to the teacher but	Having a clear observation guide helped, but I think having more opportunities to observe different teachers and classes would be helpful. This would allow me to see different teaching styles and approaches and reflect on which practices I can apply

institutions	learners, asks questions, manages the class, and checks if the students understand. It also helped me connect the concepts we discuss in class with what actually happens in a classroom.	also to how the learners responded to the lesson and activities.	in my own teaching.
2. Service Learning (SPIMS Module Assessors)	The SPIMS helps me gain more insights from other teaching professionals. It also encouraged me to do better and persevere.	One of my challenges is to make sure I can give objective scores and carefully examine their output and gain something from it.	I think clearer instructions and timelines at the beginning would make the activity easier to manage. It would also help to have a short orientation so everyone understands their roles before starting.
3. Personal Growth and Professional Development via CIVER Webinar	The CIVER webinar gave me the opportunity to learn new ideas and perspectives related to teaching. It also reminded me of the importance of continuous professional development. Aside from learning from the speaker, I also practiced taking notes, reflecting on the ideas presented, and thinking about how I could apply them to my own teaching.	There was a lot of information to take in during the webinar, and some ideas needed more time for me to fully understand and connect with my own teaching experience.	It would be helpful if there were more opportunities to discuss or apply the ideas after the webinar. Even a short reflection or activity after the session could help participants connect what they learned to actual teaching situations.
4. Personal Growth and Professional Development via CIVER Onsite Seminar	The onsite seminar helped me develop my communication and collaboration skills. I also appreciated being able to interact with other CTP students and hear their experiences. It reminded me that teachers can learn a lot from one another, especially when we share different experiences and perspectives.	One challenge was balancing the seminar with my other responsibilities. At the same time, I also had to make an effort to actively participate while taking in the different ideas and information being shared.	I think having more small-group discussions and activities would make the seminar even more engaging. It would also be helpful to have reflection questions afterward so participants can think about how they can apply what they learned.

Part III. E-Portfolio Self-Assessment Rating

1. Do a self-assessment of your own e-portfolio based on your professional judgment on how the indicators are demonstrated.
2. Summarize your scores in the Summary Table prepared for you.
3. Submit at ePNU on or before November 15, 2025 .

No	Criteria	Performance Levels and Indicators			Score	
1	Content (20%) a. comprehensiveness b. completeness c. organization	Excellent (10 pts)	Outstanding (7-9 pts)	Very Satisfactory (5-6 pts)	Self - Rating	Professor
		Shows very comprehensive logical and coherent presentation of content of all 5 completed evidences/outputs	Shows logical and coherent presentation of content of at least 3 evidences/ outputs	Shows coherent presentation of content of at least 2 and below evidences/ outputs	10	
2	Reflections (20%) a. organization b. language c. impact (Based from the answers in Part I and II above.)	Conveys deep and coherent ideas using above standard language which projects a high and lasting impact to audience or readers	Conveys coherent ideas using a standard language which projects a moderate impact to audience or readers	Conveys simple ideas using standard language which projects a minimum impact to audience or readers	10	
3	Mechanics (20%) a. language b. grammar c. gender inclusivity	Uses above standard language and correct grammar and strong gender inclusivity	Uses acceptable language and grammar and moderate gender inclusivity	There is presence of a few inappropriate language and incorrect grammar and minimal gender inclusivity	10	
4	Multimedia (20%) a. graphics	Multimedia show high quality multimedia that	Multimedia how average quality	Multimedia is simple and uses just	10	

(All documents without the PNU QM Stamp or Control Identifier are uncontrolled)

	b. sound c. transitions	uses variety of technologies in creating graphics which captures interest of audience or readers with very appropriate animations.	multimedia that uses a few of technologies in creating graphics	1 or 2 technologies in creating graphics		
5	Punctuality (10%)	Submitted before due date or on time	Submitted 1 to 5 days after due date	Submitted 6 days or more after due date	7	
6	Overall (10%)	Portfolio is complete, clear, well-organized and all supporting documentations are located in sections clearly designated	Portfolio is complete, clear, well-organized: most supporting are available and logical and clearly marked locations	Portfolio is incomplete: supporting documentations are organized but are lacking	10	
Partial Points						
TOTAL SCORE					37
