

2E-EDUC 3 – Principles and Methods of Teaching
Term 1 AY 2026-2027

PROJECT WORK: WEEKLY CURRICULUM PLANNING

Subject/Learning Area: English Grade Level: 10	Quarter: 3 Week: 2 Group No: 2
Names of Members: 1. Leader: Ivan Dione Soria 2. Rose Marianne Louis Gardoce 3. Donna Jane Panaguiton 4. Kenn Arcenal	

Direction:

- After gaining knowledge and understanding on Instructional/Lesson planning from online synchronous discussion and the Activity/Worksheet on Compilation and Critiquing of the different approaches and strategies of the different subjects adopting various instructional designs such as and DepEd IDEA Model/ MATATAG Learning Packages sample and 7-E Instructional Model lesson plans, your team will now write a Lesson Plan adopting an instructional design familiar to you or the most appropriate given your Learning Competencies/Lesson Objectives. Likewise, you will apply the TPACK theory in developing your lesson plan.

WEEKLY CURRICULUM PLANNING TEMPLATE/FORMAT

Direction:

1. Your group will use the template below in developing/creating your Weekly lesson plan.
2. Present/Identify the following essential components:
 - a) Learning Competencies
 - b) Learning Objectives (Unpacked learning objectives from the Learning Competency; expressed daily)
 - c) Learning Activities to Achieve / Teaching Strategies/Differentiated Instruction (you may include ways on how to contextualize (localize or indigenize) the learning activity.
 - d) Assessment Activities/ Strategies and Tools
 - e) Resources
 - f) Integration
3. This is a sort of brief lesson planning. You need not to put all the details.
4. From this weekly plan, your group will choose the specific Day to develop a full-blown Detailed Integrated Lesson Plan using another template in a separate worksheet. I suggest if possible Day 3 or 4 that targets higher order thinking skills (HOTS) and discusses real-life issues/application. In this day, learners are presumed to have mastered the basic/foundational content and skills.

Name of Subject/ Learning Area: English

Key Stage Standards

(If Key Stage 3 – Grades 7, 8, and 9, please copy the terminal standards at the end of Grade 9)

- By the end of the lesson, Grade 10 learners can critically analyze and evaluate the style, form, and features of literary, informational (non-journalistic, journalistic, and academic texts), and transactional texts. They are able to compose and publish a range of multimedia texts for a variety of meanings, purposes, and audiences, including learning in other content areas; and take pride in their cultural heritage.

Grade Level Standards (Copy the Specific Grade Level only): Grade 10

The learners use their multiliteracies and communicative competence in evaluating World literature, and informational and transactional texts; and create texts in various modalities for a variety of purposes, meanings, and target audiences, which reflect their expanding cultural identity (Philippines, Afro-Asia, Anglo-America, and the World)

QUARTER: 3 WEEK : 2

Content Standard/s:

The learners demonstrate their multiliteracies and communicative competence in evaluating informational texts (research report [stage 1] based on literature review) and transactional texts (letter of application) for clarity of meaning, purpose, and target audience as a foundation for publishing original informational and transactional texts.

Performance Standard/s:

The learners analyze the style, form, and features of informational texts (research report based on literature review) and transactional texts (letter of application); evaluate informational and transactional texts for clarity of meaning, purpose, and target audience; and compose and publish original multimodal informational texts (research report [stage 1] based on literature review) and transactional texts (letter of application) using appropriate forms and structures that represent their meaning, purpose, and target audience.

Performance Task:

Climate Information Brief

Learners will create a short informational text about a selected topic related to global warming and climate change. Using at least two teacher-provided sources, learners

will extract significant information, synthesize relevant ideas, and organize them into a clear and coherent informational text.

Points of Integration with other School Subjects (Indicate Subject, Grade Level, Learning Competency and Topic):

Subject: Science

Topic: Climate Change and Global Warming

Grade: 10

Quarter: 1

Learning Competencies:

- No. 8. Identify evidence of global warming and climate change;
- No. 9. Identify the role of greenhouse gases in enhanced global warming and climate change;
- No. 10. Describe how global climatic phenomena, such as the El Niño Southern Oscillation, may impact weather systems
- No. 11. Identify local impacts of global climate change and suggest ways that individuals can do to reduce the impact of global warming.
- No. 12. Explain how increased societal uses of renewable energies could mitigate the effects of global climate change, including how the Philippines could make better use of its plentiful natural resources.

Week and Day	Learning Competencies	Learning Objectives (Unpacked learning objectives from	Learning Activities to Achieve / Teaching Strategies/Differentiated Instruction	Assessment Activities/ Strategies and Tools	Resources (References, Instructional aids,	Integration (Integration of other subjects of the same grade level) (Indicate

	(you intend to cover for the week)	learning competencies)	(you may include ways on how to contextualize (localize or indigenize) the learning activity.		realia, including ICT, other apps)	name of subject and Learning Competencies
Week: 2 Day 1/Lesson 1: Identifying text type and central idea Content/Topic: Global Warming and Climate Change	EN10INF-III-9 Identify the text type appropriate for one's topic, purpose, and target audience. EN10INF-III-11 Determine one's thesis as the central idea of the paper.	By the end of the lesson, learners should be able to: 1. Identify the purpose, target audience, and appropriate text type for a given climate-related topic. 2. Analyze different informational texts to determine their central idea and supporting information.	A. Preliminary Learning Activities/Introduction I. Activating Prior Knowledge Activity: "What Would You Write?" The teacher presents a common real-life situation: Your community has been experiencing increasingly hot weather. You want people to understand why this is happening and what they can do about it. What would you write?	Formative Assessment Text Type Detectives Worksheet Assesses learners' ability to identify: - purpose; - target audience; - text type; - textual evidence supporting their answer. Individual	- Teacher-selected informational texts on global warming and climate change - Short news reports/informational articles - Text Type Detective Worksheet - Writing	Science: Grade 10 Topic: Climate Change and Global Warming Grade 10 -Quarter 1 No. 8. Identify evidence of global warming and climate change;

			Learners choose from: • News report • Informative article • Research report • Persuasive/position paper • Social media post • Letter <i>B. Developmental Learning Activities/Lesson Proper</i> I. ENGAGE Activity: “Same Topic, Different Text” Time: 10 minutes The teacher presents three short excerpts about global warming. II. EXPLORE	Assessment	Blueprint/Exit Ticket	
					• Presentation slides • Mentimeter or Google Forms • Digital copies of texts • Highlighters/annotation tools • Internet resources for climate-related information	

Activity: “Text Type Detectives”

Time: 15 minutes

Learners work in small groups.

Each group receives three short climate-related texts representing different informational purposes.

III. EXPLAIN

Mini-Lesson: Topic, Purpose, Audience, and Text Type

Time: 10 minutes

The teacher consolidates the learners' observations.

IV. ELABORATE

Activity: “Find the Heart of the Text”

Time: 15 minutes

Learners receive a short informational text about a

climate-related issue

V. EVALUATE

Activity: “Choose Your Mission”

Time: 15 minutes

Learners are given one climate-related topic and different communication situations.

C. Concluding/ Closure Learning Activities

Reflection and Synthesis

Activity: “Which One Doesn’t Belong?”

Time: 5 minutes

The teacher presents a communication situation and four possible text types through a Zoom poll. Learners select the text type

			they think does not best fit the given purpose and audience, then briefly explain their choice. This serves as a quick formative assessment of their understanding of how purpose, audience, and text type are connected.			
Week and Day	Learning Competencies (you intend to cover for the week)	Learning Objectives (Unpacked learning objectives from learning competencies)	Learning Activities to Achieve / Teaching Strategies/Differentiated Instruction (you may include ways on how to contextualize (localize or indigenize) the learning activity.	Assessment Activities/ Strategies and Tools	Resources (References, Instructional aids, realia, including ICT, other apps)	Integration (Integration of other subjects of the same grade level) (Indicate name of subject and Learning Competencies
Day 2/Lesson 2: Text Type and Multimodal Content/Topic: The Effect and Role of Greenhouse	EN10INF-III-12 Compose the informational text based on the chosen text type. EN10INF-III-13	By the end of the lesson, learners should be able to: 1. Explain the characteristics and purpose of the chosen informational	<i>A. Preliminary Learning Activities/Introduction</i> I. Activating Prior Knowledge Activity: “Heat Check!” Time: 5 minutes The teacher presents a simple	- Diagnostic Assessment - Formative Assessment - Performance Assessment - Assessment Tool: Teacher-made	National Aeronautics and Space Administration. Gases	Apply multimodal elements appropriate to the chosen text delivery/ies.	text type. 2. Apply appropriate multimodal elements, such as images, graphics, typography, and layout, to enhance the delivery of an informational text. 3. Demonstrate understanding of the chosen text type by applying appropriate multimodal elements in presenting informational content.	illustration comparing Earth with and without greenhouse gases. Learners briefly share what they already know about greenhouse gases, heat, and Earth's temperature. <i>B. Developmental Learning Activities/Lesson Proper</i> I. ENGAGE Activity: "Where Does the Heat Go?" Time: 10 minutes The teacher presents a short scenario showing how sunlight enters Earth's atmosphere and how some heat is retained. Learners predict what would happen if greenhouse gases were absent or increased. II. EXPLORE	rubric Exit Ticket	Science. https://science.nasa.gov/kids/earth/what-is-the-greenhouse-effect/ - National Aeronautics and Space Administration. (2025). <i>Meet the greenhouse gases!</i> NASA Climate Kids. https://climatekids.nasa.gov/greenhouse-cards/ - Instructional Aids: Sample	of greenhouse gases in enhanced global warming and climate change.
-------	--	---	--	---	--	--

			Activity: “Greenhouse Gas Investigators” Time: 15 minutes Learners work in small groups and examine short information cards about carbon dioxide, methane, water vapor, and other greenhouse gases. They identify each gas's role and possible effects on Earth's temperature. III. EXPLAIN Mini-Lesson: “The Effect and Role of Greenhouse Gases” Time: 10 minutes The teacher explains the greenhouse effect, the role of greenhouse gases in maintaining Earth's temperature, and how excessive concentrations can contribute to global warming and climate change.		informational texts, greenhouse effect diagrams, information cards, activity sheets • ICT: Laptop/computer, projector/Smart TV, internet connection • Application: Canva for designing and presenting the informational text • Other	
--	--	--	--	--	---	--

		IV. ELABORATE Activity: “Connect the Cause and Effect” Time: 15 minutes Learners analyze a short informational text about greenhouse gases and identify the cause-and-effect relationships between greenhouse gas emissions, heat retention, global warming, and climate change. V. EVALUATE Activity: “Make the Information Visible” Time: 15 minutes Learners use Canva to present the information about the role and effects of greenhouse gases. They use appropriate images, graphics, headings, typography, and layout to		Materials: Whiteboard and markers	
--	--	---	--	---	--

make the informational content clear and easy to understand.

C. Concluding/Closure Learning Activities

Reflection and Synthesis

Activity: “Explain It in One Minute”
Time: 5 minutes

Learners briefly explain how greenhouse gases help regulate Earth's temperature and how excessive greenhouse gases affect the environment. They also identify one multimodal element they used in their Canva output and explain why it was appropriate.

Week and Day	Learning Competencies (you intend to cover for the week)	Learning Objectives (Unpacked learning objectives from learning competencies)	Learning Activities to Achieve / Teaching Strategies/Differentiated Instruction (you may include ways on how to contextualize (localize or indigenize) the learning activity.	Assessment Activities/ Strategies and Tools	Resources (References, Instructional aids, realia, including ICT, other apps)	Integration (Integration of other subjects of the same grade level) (Indicate name of subject and Learning Competencies
Day 3/Lesson 3: Use of discipline-specific words, voice, technical terms in research, and conceptual, operational, and expanded definition of words Content/Topic: Global Warming and Climate Change	EN10INF-III-3 Analyze the use of discipline-specific words, voice, technical terms in research, and conceptual, operational, and expanded definition of words. EN10INF-III-4 Extract significant	By the end of the lesson, learners should be able to: 1. Compare the use of discipline-specific words and technical terms related to global warming across informational and research texts. 2. Evaluate informational text excerpts based on their use of	A. Preliminary Learning Activities/Introduction I. Activating Prior Knowledge Activity: “Climate Word Mystery” Time: 5 minutes The teacher uses Mentimeter to ask learners to submit unfamiliar, scientific, or climate-related terms they encountered while watching <i>An Inconvenient Truth</i> . The teacher displays the responses and briefly discusses the most frequently identified terms.	- Diagnostic Assessment - Formative Assessment - Collaborative Assessment - Performance Assessment: report or technical report. - Assessment Tool: Teacher-made rubric - Exit Assessment	- Selected segments of the documentary <i>An Inconvenient Truth</i> (assigned as homework) - Teacher-selected informational /research excerpts on global warming and climate	Science: Grade 10 Topic: Climate Change and Global Warming Grade 10 -Quarter 1 No. 11. Identify local impacts of global climate change

	information. EN10INF-III-8 Synthesize significant information	technical terms, objective academic voice, and precise definitions. 3. Construct a mini-literature review that appropriately applies specialized climate terms and demonstrates their conceptual and operational meanings.	<i>B. Developmental Learning Activities/Lesson Proper</i> I. ENGAGE Activity: “Climate Vocabulary Investigation” Time: 15 minutes Learners work in groups and examine selected excerpts from a climate-related news report and technical report. They identify unfamiliar, discipline-specific, and technical terms and compare how these terms are used in the two texts. II. EXPLORE Activity: “Compare and Contrast” Time: 10 minutes Learners use a worksheet to identify		change • Board/whiteboard and markers • Worksheet (Compare-Contrast) • Printed excerpts or digital copies of texts • Highlighters or annotation tools • Vocabulary/analysis worksheet • Internet for e-dictionary or LLM access	
--	--	--	--	--	--	--

similarities and differences in the vocabulary, voice, and writing style between the news report and the technical report.

Guide Questions:

- Which words are specific to global warming and climate change?
- Which text contains more technical words?
- How does the surrounding sentence help explain the term?
- What might happen if technical terms were replaced with vague words?

III. **EXPLAIN**

Mini-Lesson: “Discipline-Specific Vocabulary and Formal Voice”

Time: 10 minutes

			The teacher discusses how informational and research texts vary in voice, writing style, and vocabulary. Learners use online dictionaries or appropriate digital tools to find operational or expanded definitions of selected technical terms. IV. ELABORATE Activity: “From Climate Information to Research Language” Time: 15 minutes Through a round-robin knowledge exchange, group representatives share selected technical terms with other groups and explain how these terms are used in research-based writing. Learners then practice replacing vague language with more precise terminology. V. EVALUATE			
--	--	--	--	--	--	--

			Activity: “Rewrite It Right” Time: 10 minutes Each group receives five informal statements about climate change and global warming. Learners revise the statements into formal statements appropriate for a news report or technical report, using appropriate discipline-specific vocabulary. <i>C. Concluding/Closure Learning Activities</i> Reflection and Synthesis Activity: “One Word, One Improvement” Time: 5 minutes Learners identify one technical term they learned and explain how using it			
--	--	--	---	--	--	--

			instead of a vague or informal expression improved the accuracy, coherence, and cohesion of their statement. The teacher concludes by emphasizing the importance of discipline-specific vocabulary and appropriate formal voice in informational and research texts.			
Week and Day	Learning Competencies (you intend to cover for the week)	Learning Objectives (Unpacked learning objectives from learning competencies)	Learning Activities to Achieve / Teaching Strategies/Differentiated Instruction (you may include ways on how to contextualize (localize or indigenize) the learning activity.	Assessment Activities/ Strategies and Tools	Resources (References, Instructional aids, realia, including ICT, other apps)	Integration (Integration of other subjects of the same grade level) (Indicate name of subject and Learning Competencies
Day 4/Lesson 4 : Cohesion and Consistency of	EN10INF-III-14 Revise the text for coherence.	At the end of the lesson, the learners should be able to:	A. Preliminary Learning Activities/Introduction I. Activating Prior Knowledge	- Diagnostic Assessment - Formative Assessment - Performance	NASA Jet Propulsion Laboratory. (2024, August 21).	Science: Grade 10 Topic: Climate Change and Global Warming

the Text Content/Topic: Global Climatic Phenomena	EN10INF-III-15 Revise the text for cohesion (diction, syntax, and style). EN10INF-III-16 Edit the text for textual consistency.	1. Revise an informational text to improve its coherence by organizing ideas logically and maintaining clear connections between them. 2. Revise an informational text to improve its cohesion through appropriate diction, syntax, and style. 3. Edit an informational text for textual consistency by checking the consistent use of language,	Activity: “Which One Fits?” Time: 5 minutes The teacher presents a short paragraph about global climatic phenomena containing several problems in the arrangement of ideas, word choice, sentence construction, and consistency. Learners identify which parts of the paragraph are difficult to understand and briefly explain why. <i>B. Developmental Learning Activities/Lesson Proper</i> I. ENGAGE Activity: “Read It Again” Time: 10 minutes The teacher presents two short	Assessment • Assessment Tool: Teacher-made rubric • Exit Ticket	<i>NASA’s eyes on extreme weather.</i> NASA JPL Education. • Instructional Aids: Sample informational texts, climate-related photographs/illustrations, revision worksheets, and editing checklists • ICT: Laptop/computer, projector or Smart TV, internet connection	Grade 10 -Quarter 1 No. 10. Describe how global climatic phenomena, such as the El Niño Southern Oscillation, may impact weather systems
--	--	--	--	--	---	---

		tense, formatting, and other textual elements.	versions of an informational paragraph about a global climatic phenomenon. One version contains unclear connections, repetitive words, and inconsistent language. Learners compare the two texts and identify which version is clearer and more effective. II. EXPLORE Activity: “Climate Text Detectives” Time: 15 minutes Learners work in small groups to examine a short informational text about global climatic phenomena. They identify problems related to coherence, cohesion, and textual consistency, such as misplaced ideas, inappropriate diction, awkward syntax, and inconsistent verb tense. III. EXPLAIN		• Digital Resources: NASA and NOAA online educational materials • Other Application: Google Docs or Microsoft Word for revising and editing the informational text	
--	--	---	--	--	--	--

Mini-Lesson: “Making an Informational Text Clear and Consistent”

Time: 10 minutes

The teacher discusses the three ways of improving an informational text:

- Coherence – organizing ideas logically and maintaining clear connections.
- Cohesion – improving diction, syntax, transitions, and style.
- Textual consistency – maintaining consistent language, tense, formatting, and other textual elements.

IV. ELABORATE

Activity: “Fix the Climate Text”

Time: 15 minutes

Learners are given an informational passage about a global climatic phenomenon. They identify and suggest revisions to improve the organization of ideas, word choice, sentence structure, transitions, and consistency of the text.

V. APPLY

Activity: “Climate Text Makeover”

Time: 15 minutes

Learners revise and edit a short informational text about global climatic phenomena. They reorganize ideas for coherence, improve diction and syntax for cohesion, and check the text for consistency in language, tense, formatting, and style.

			C. Concluding/Closure Learning Activities Reflection and Synthesis Activity: “Before and After” Time: 5 minutes Learners compare the original and revised versions of their informational text. They identify one significant change they made for coherence, one for cohesion, and one for textual consistency.			
Week and Day	Learning Competencies (you intend to cover for the week)	Learning Objectives (Unpacked learning objectives from learning competencies)	Learning Activities to Achieve / Teaching Strategies/Differentiated Instruction (you may include ways on how to contextualize (localize or indigenize) the learning activity.
