

## 2E-EDUC 3- PRINCIPLES AND METHODS OF TEACHING

Classroom Observation Tool for PNU FGEEL

August 10-14/August 17-21/August 24-28, 2026

Name of CTP Student: Rose Marianne Louis M. Gardoce

Degree Finished: September 20, 2026

Currently Teaching: Yes ☒ No:

Date Submitted: September 20, 2026

### Class Observation Profile

School/Institution: PNU-CTL

Date of Observation: August 17, 2026

Modality ( Online or Onsite) : Online

Time: 7:00AM – 9:00AM

Learning Area/Subject Observed: English

Grade/Year Level: Grade 9

No. of Students: Boys 18 Girls 19 Total: 37 students

Duration of Class: 1 hour and 30 minutes (lesson proper) feedback (30 minutes)

Subject Matter/Topic: **Binary Oppositions: The Power of Opposites**

#### Lesson Objectives:

- Define binary opposition as a literary concept and its role in understanding texts.
- Appreciate the importance of examining opposing perspectives in societal values presented in The Lottery.
- Construct a polarity map that illustrates the major opposing concepts in The Lottery.

## Part I. Overview of Teaching-Learning Observations

Observe the teaching and learning episode and answer the following briefly:

| Questions                                                                                                   | Brief Significant Observations                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|-------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. How did the teacher implement the following? Please describe teaching strategies and/or techniques used. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| (A) Lesson Introduction/Preliminary                                                                         | The teachers initialized the online class with standard routines (opening prayer, clean/tidy workspace reminder, attendance check). They facilitated an interactive warm-up activity called "Pose or Oppose?" using popular internet culture gestures (Sigma Pose, Thinking Pose, Heart Hands). This recalled prior knowledge on Semiotics (Sign and Referent) and led learners to discover that concepts gain clearer meaning when contrasted with their opposites.                |
| (B) Lesson Development/Lesson Proper                                                                        | The teachers utilized guided situational analysis (scaffolding examples from <i>The Tell-Tale Heart</i> and <i>The Lady or the Tiger?</i> ) before formally defining <i>Binary Opposition</i> . They employed a <i>Think-Pair-Share</i> routine, examined pop-culture examples ( <i>Avengers: Endgame</i> , <i>Romeo and Juliet</i> ), and engaged students in literary excerpt analysis ("Spot the Opposition") using textual excerpts from Shirley Jackson's <i>The Lottery</i> . |
| (C) Culmination/Closure                                                                                     | The teachers synthesized the lesson by connecting binary opposition beyond literary analysis to real-life critical thinking (analyzing societal/media black-and-white narratives). A thought-provoking reflective exit prompt was given regarding how identifying binary opposites empowers individuals to challenge blind tradition.                                                                                                                                               |
| 2. How did the teacher communicate the lesson objectives?                                                   | Objectives were clearly stated and chunked into three distinct domains:<br><ul style="list-style-type: none"> <li>- Knowledge (Define binary opposition),</li> </ul>                                                                                                                                                                                                                                                                                                                |

|                                                                                      |                                                                                                                                                                                                                                                                                                 |
|--------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                                      | <ul style="list-style-type: none"> <li>- Affective/Appreciation (Examine opposing perspectives in societal values in <i>The Lottery</i>)</li> <li>- Psychomotor/Performance (Construct a Polarity Map). These were reinforced prior to the main discussion and assessment.</li> </ul>           |
| 3. What content/topic did the teacher develop in the lesson?                         | <b>Binary Opposition in Anglo-American Literature</b> (specifically examining structuralist literary analysis through Shirley Jackson's <i>The Lottery</i> across pairs such as Tradition vs. Change, Community vs. Individual, and Normalcy vs. Violence).                                     |
| 4. What dominant teaching methods/ approaches/ did the teacher use? Please describe. | <b>Structuralist/Concept-Attainment Approach &amp; Interactive Dialogue:</b> The lesson moved inductively from concrete, familiar visual signs (poses) to abstract literary concepts, then applied the concept to complex literary texts using scaffolded text analysis and guided questioning. |
| 5. What teaching style (s) did the teacher use?                                      | <b>Facilitative, Student-Centered, and Collaborative:</b> Teachers acted as guides, prompting student discovery through Socratic questioning, peer interactions (Think-Pair-Share), and multi-teacher team teaching.                                                                            |
| 6. What instructional materials including technology were used by the teacher?       | Interactive presentation slides (Canva), digital excerpt flashcards/slides, downloadable Google Drive worksheets ( <i>The Polarity Map Worksheet</i> ), and visual prompt graphics (meme poses/gestures).                                                                                       |
| 7. How did the teacher assess the attainment of the lesson objectives?               | Through ongoing formative oral checking during guided excerpt analysis, student presentation of Think-Pair-Share pairs, and an individual formative performance task: constructing <i>The Polarity Map</i> evaluated against a 20-point analytic rubric.                                        |

| 5  | <ul style="list-style-type: none"> <li>• use varied and appropriate instructional materials and resources that support the lesson objectives and engage learners in meaningful learning for the development of the content and new literacy/21<sup>st</sup> century skills</li> </ul>                       |                                                                                                                                                                                                                                                                                                                         |
| 6  | <ul style="list-style-type: none"> <li>• use appropriate information and communications technology (ICT) that enhance and support teaching and learning for the development of the content and the new literacy/21<sup>st</sup> century skills</li> </ul>                                                   | Leveraged varied materials including literary excerpts, graphic organizers (Polarity Map), rubrics, and online presentation decks to cater to multi-modal learners. Effective use of Canva digital decks, Google Drive distribution links, and online interactive display tools tailored for an online delivery format. |
| 7  | <ul style="list-style-type: none"> <li>• use varied teaching strategies that enhance learner achievement of content and new literacy/21<sup>st</sup> century skills including 4Cs as well as other higher-order thinking skills in consideration with learners' needs, interests and experiences</li> </ul> | Employs Critical thinking (deconstructing text), Collaboration (Think-Pair-Share), Communication (oral responses), and Creativity (Polarity Mapping justification).                                                                                                                                                     |
| 8  | <ul style="list-style-type: none"> <li>• manage classroom structure to engage learners, individually or in groups, in meaningful exploration, discovery and hands-on activities within a range of physical learning environments</li> </ul>                                                                 | Successfully structured digital breakout/peer interactions (Think-Pair-Share with seatmates/online partners) and individual reflective output generation.                                                                                                                                                               |
| 9  | <ul style="list-style-type: none"> <li>• use effective verbal and non-verbal communication strategies to support learner understanding, participation, engagement and achievement</li> </ul>                                                                                                                | Teachers used inviting, clear, and encouraging language, prompting thoughtful answers and affirming student contributions during processing.                                                                                                                                                                            |
| 10 | <ul style="list-style-type: none"> <li>• manage learner behavior constructively by applying positive and non-violent discipline to ensure learning focused environment</li> </ul>                                                                                                                           | Maintained a clean, focused virtual environment through smooth transitions between team teachers and clear, structured participation instructions.                                                                                                                                                                      |
| 11 | <ul style="list-style-type: none"> <li>• design and use varied and appropriate assessment /evaluation strategies consistent with lesson objectives with clear criteria and standards that show evidence of student contribution to their development.</li> </ul>                                            | Implemented The Polarity Map with a clear 4-level analytic rubric (20 points) evaluating Concept Identification, Textual Evidence, Analysis/Justification, and Organization.                                                                                                                                            |

|     |                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                      |
|-----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 12. | <ul style="list-style-type: none"> <li>use questioning and discussion techniques which reflects high-level questions, true discussion, and full participation by all students.</li> </ul>                                                                                                                                                            | Guide questions progressed from lower-order identification ("What is the sign?") to higher-order evaluation ("Why do stories rely on contrasting pairs?" / "What does this tell us about society?"). |
| 13  | <ul style="list-style-type: none"> <li>provide application /extension /reinforcement/enrichment activities to create/produce a project/ or performance to demonstrate acquired knowledge and skills of content and new literacy /21<sup>st</sup> century skills through well-defined agreement and established connection to next lesson.</li> </ul> | Connected the literary concept to real-world decision making and analyzing media polarization outside the classroom.                                                                                 |
| 14  | <ul style="list-style-type: none"> <li>show good pacing of the lesson which provides students the time needed to intellectually engage with and reflect upon their learning and to consolidate their understanding,</li> </ul>                                                                                                                       | Well-allocated timing across sections (15 mins Warm-up, 50 mins Discussion/Analysis, 20 mins Mapping Task, Syntheses) allowing adequate time for reflection.                                         |
| 15  | <ul style="list-style-type: none"> <li>has a clear audible spoken language which conveys information and ideas clearly, pleasing personality and exudes energy and dynamism.</li> </ul>                                                                                                                                                              | Teachers maintained high dynamism, clear articulation, and warm enthusiasm suitable for early morning (7:00 AM) online engagement.                                                                   |
| 16  | <ul style="list-style-type: none"> <li>show rapport, recognize and appreciate individual and/or group effort, participation and contribution that led to the success of the lesson.</li> </ul>                                                                                                                                                       | Consistently validated student responses with specific praise (e.g., "Very good. You were able to identify opposing ideas even without knowing the literary term yet").                              |

**Note: This is a teacher-made observation tool drawn from various sources and is intended solely for this course.**

### **Part III. A More Detailed Observations by Domains and Indicators**

#### **Domain A. Content Knowledge and Pedagogical Principles (CHED:**

##### **Professional Knowledge/PPST Domain 1**

| <b>Indicators</b>                                  | <b>Observation Notes</b>                                                                                                                        |
|----------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Teacher demonstrates mastery of subject matter. | Seamlessly connected Semiology/Structuralism concepts (Saussure, signs, referents) to literary binarism in popular culture and canonical texts. |
| 2. Concepts are presented accurately and clearly.  | Clear distinction made between simple dictionary antonyms and                                                                                   |

|                                                                                                      |                                                                                                                                            |
|------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                                                      | thematic literary binary oppositions representing core societal values.                                                                    |
| 3. Teaching reflects sound principles of learning (e.g., motivation, readiness, reinforcement, etc.) | Applied constructivism—building from known concepts (social media poses) to unknown abstract critical frameworks.                          |
| 4. Instruction is appropriate to learners' level.                                                    | Tailored for Grade 9 learners by bridging high-level literary theory with engaging, accessible pop-culture media (Avengers, Hunger Games). |

**Reflective Prompt: Which teaching principles were most evident in the lesson?**

Constructivism and Scaffolding were most evident. The lesson systematically bridged students' prior knowledge of visual signs/gestures to literary binarism, grounding complex structuralist theory in familiar pop culture before tackling high-level literary text analysis.

Domain B. Instructional Methods and Strategies

(CHED: Pedagogical Skills / PPST Domain 1 & 4)

| Indicators                                                                   | Observation Notes                                                                                                                                        |
|------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Teaching method matches lesson objectives.                                | Inductive concept attainment and analytical graphic mapping directly fulfilled the objectives of defining, appreciating, and constructing polarity maps. |
| 2. Strategies are varied (lecture, discussion, inquiry, demonstration, etc.) | Included gamified warm-ups, direct instruction, Think-Pair-Share, excerpt-based close reading, and individual visual mapping.                            |
| 3. Teacher uses questioning to promote thinking.                             | Used probing questions that required students to infer thematic meaning rather than just recall plot points.                                             |
| 4. Learners are actively engaged in learning tasks.                          | Active participation throughout—imitating poses, sharing pair-work responses, analyzing quotes, and completing the mapping task.                         |

**Reflective Prompt: How effective were the chosen teaching methods in facilitating student learning?**

Highly effective. Transitioning from visual gestures to literary excerpts provided a clear mental ladder, enabling students to independently identify complex thematic oppositions (e.g., Normalcy vs. Violence) in *The Lottery*.

**Domain C. Curriculum Alignment and Lesson Structure**

**(CHED; Curriculum Competence / PPST Domain 4)**

| Indicators                                                                            | Observation Notes                                                                                                                                                   |
|---------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Lesson objectives are aligned with K-12 Curriculum Guide/MATATAG Curriculum Guide. | Fully compliant with EN9LIT-I-1 focusing on analyzing literary texts as expressions of individual/communal values.                                                  |
| 2. Lesson sequence ( scaffolding the order of topics) is logical and coherent.        | Clear logical flow: Motivation $\rightarrow$ Concept Definition $\rightarrow$ Guided Practice $\rightarrow$ Textual Application $\rightarrow$ Formative Assessment. |
| 3. Learning activities support the attainment of learning objectives.                 | Each activity directly trained students for the final performance output (Polarity Map).                                                                            |
| 4. Instruction connects to real-life or local contexts.                               | Connected binary oppositions to everyday decision-making, social media trends, and societal pressures.                                                              |

**Reflective Prompt: How does the lesson design support meaningful learning?**

The structure moves beyond rote text comprehension by encouraging students to analyze *how* binary structures drive human conflict, transforming literature into a tool for evaluating real-world societal dynamics and ethics

## Domain D. Learner Engagement & Diversity

(CHED: Learner-Centered Teaching / PPST Domain 3)

| Indicators                                                                                                  | Observation Notes                                                                                                  |
|-------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------|
| 1. Learners participate actively.                                                                           | Frequent student responses recorded across all discussion rounds.                                                  |
| 2. Instruction considers learner diversity.                                                                 | Accommodated visual, auditory, and kinesthetic modalities (imitating poses, reading excerpts, graphic organizing). |
| 3. Teacher encourages collaboration and interaction between and among learners and small group of learners. | Think-Pair-Share activity facilitated peer dialogue and idea cross-pollination.                                    |
| 4. Learners demonstrate understanding during the lesson.                                                    | Student responses correctly identified complex oppositions like Tradition vs. Change and Community vs. Individual. |

### Reflective Prompt: How does the teacher address differences among learners?

The teachers provided multiple entry points to understanding visual gesture modeling for kinesthetic/visual learners, pop-culture films for relatable context, and textual excerpts for analytical readers.

## Domain E. Assessment & Feedback

### (CHED: Assessment Literacy / PPST Domain 5)

| Indicators                                             | Observation Notes                                                                                                          |
|--------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------|
| 1. Teacher checks for understanding during the lesson. | Frequent processing questions after each text excerpt served as ongoing checks for understanding.                          |
| 2. Assessment methods align with lesson objectives.    | The Polarity Map directly evaluated students' ability to identify, support, and justify binary oppositions in The Lottery. |
| 3. Feedback is timely and constructive.                | Instant verbal validation and refinement were provided after student responses in each discussion round.                   |
| 4. Learners are informed of performance expectations.  | An explicit 20-point analytic rubric was provided along with the Polarity Map Worksheet.                                   |

### Reflective Prompt: How does assessment support learning rather than merely measure it?

The Polarity Map acts as both a learning tool and an assessment. Synthesizing opposing quotes alongside a written justification required students to deepen and solidify their thematic insights as they completed the task.

## Domain F. Classroom Management & Learning Environment (CHED:

### Professional Practice / PPST Domain 2)

| Indicators                                           | Objective Evidence/Observation Notes                                                                                |
|------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------|
| 1. Classroom routines are well-established.          | Smooth execution of opening prayer, attendance checks, and desk/environment readiness routines.                     |
| 2. Teacher manages behavior positively.              | Affirmative feedback used exclusively; clear guidelines provided for peer and group interactions.                   |
| 3. Learning environment is respectful and inclusive. | Encouraged open expression when students shared personal or film-based examples.                                    |
| 4. Instructional time is maximized.                  | Precise time limits allocated and strictly observed for each segment (15m warm-up, 50m discussion, 20m assessment). |

### Reflective Prompt: How does classroom management support effective instruction ?

**Well-defined time limits and seamless co-teaching transitions kept student engagement high and eliminated downtime, maximizing the 2-hour online instructional block.**

**Domain G. Values Integration & Professional Ethics (CHED: Ethical Practice / PPST Domain 6)**

| <b>Indicators</b>                                                                                 | <b>Objective Evidence/Observation Notes</b>                                                                                                     |
|---------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Teacher models professionalism and ethical conduct.                                            | Exemplary preparation, clear language, well-formatted digital assets, and full disclosure of AI collaboration per DO 3 s.2026.                  |
| 2. DepEd Core Values ( Maka-Diyos/Maka-tao, Makakalikasan and Makabansa) are evident in practice. | Maka-tao and Makabansa emphasized by examining human rights, standing up against harmful social practices, and individual vs. community ethics. |
| 3. PNU Core Values (Truth, Excellence and Service) are evident in practice.                       | Excellence shown in high-quality lesson design; Truth shown through critical evaluation of texts and societal practices.                        |
| 4. There is a rapport and respectful teacher-learner interaction.                                 | Encouraging tone throughout; teachers actively listened to and validated diverse student interpretations.                                       |
| 5. Teacher demonstrates commitment and dedication to teaching.                                    | High level of lesson preparation, well-designed worksheets, and clear team-teaching coordination.                                               |

**Reflective Prompt: How are values and professionalism reflected in teaching practice?**

Professionalism is highlighted in the rigorous alignment of materials and explicit AI integration reporting. Values are integrated by guiding students to evaluate the ethical implications of blind conformity versus standing up for individual justice.

**Note: The indicators are AI-generated and solely for the purpose of this course.**

### Part III. Reflections:

Please answer the following questions with brief and concise response.

1. Over-all, how would you describe the teaching-learning episode you observed? What are the strong areas/ strategies or techniques which you think is a good practice?

The observed demo class was highly engaging, exceptionally structured, and exemplarily executed. The team-teaching approach maintained high energy throughout the 2-hour online block. The strongest strategy was the scaffolded inductive transition—using social media trends ("Pose or Oppose?") to introduce Semiotics, moving to popular movies to establish Binary Oppositions, and finally applying the concept to literary text analysis in Shirley Jackson's *The Lottery*. Another outstanding practice was pairing graphic organizer construction (Polarity Map) with explicit rubric-based criteria, ensuring high clarity of learning expectations.

2. Which of the indicators do you think is/are most challenging to you? Please explain briefly.

Indicator 12 (Using questioning and discussion techniques reflecting high-level questions and true discussion) is often the most challenging. Crafting prompts that push students beyond simple textual retrieval to deep thematic evaluation requires real-time agility, especially in an online modality where waiting for student responses requires careful wait-time management and strategic rephrasing.

3. What words of advice would you give to a new teacher regarding the following areas?

(a) lesson planning

Always start with the end in mind. Ensure that your learning objectives are clear, measurable, and directly tied to your assessment. Scaffold your activities so that every warm-up and practice task explicitly builds the skills required for the final evaluation.

(b) conducting a demonstration lesson

Establish strong rapport early and maintain excellent pacing. Don't just talk at your students—engage them through meaningful questioning, validate their contributions specifically, and use relatable anchor examples to make complex concepts feel accessible.

PHILIPPINE NORMAL UNIVERSITY  
The National Center for Teacher Education  
**COLLEGE OF ALTERNATIVE AND LIFELONG LEARNING**

(c) observing a lesson demonstration

Look beyond what the teacher is doing and focus on what the learners are experiencing. Observe how students respond to questions, how instructional transitions are handled, and how effectively the assessment tasks measure true conceptual understanding.

4. What insights did you gain from this lesson observation experience in relation to the course - Principles and Methods of Teaching?

This observation reinforced that learning is most profound when abstract critical theories are grounded in students' lived realities. The effective use of constructivist scaffolding demonstrated that complex literary criticism (such as structuralist binarism) does not have to be intimidating if broken down into relatable visual, cultural, and textual steps. Furthermore, it underscored that assessment should be an active learning experience; tools like the Polarity Map allow students to synthesize and visualize their thinking rather than merely regurgitating facts.
