

2E-EDUC 3- PRINCIPLES AND METHODS OF TEACHING

Term1 SY 2026-2027

Self-Peer Assessment for Online Demonstration Lesson

Name of CTP Student: Louis Gardoce

Group No.: Group 2 (English Group)

Date Submitted: September 26, 2026

Direction:

1. All students will accomplish this Peer Assessment for all the 3 DEMO Groups (including one's own group).
2. Reflect the sub-scores and the Total Scores per Demo group.
3. Answer the open-ended questions.
4. Upload in the ePNU LMS on or before September 20, 2026.

Part 1. Profile of the Demo Group and Demo Plan

Please supply the table below with the needed information about the Demo lesson.

DEMO Group No. and Members	Subject/Learning Area and Grade Level	Topic/Content	Learning Competency	Learning Objectives
Group 1 – Raine, Shane, EJ, Theresa and Val	Araling Panlipunan (linked to Edukasyon sa Pagpapakatao) - Baitang 10	Kasarian at Diskriminasyon (Gender and Discrimination)	AP10IKK-IVa-1: Nakagagawa ng hakbang na nagsusulong ng pagtanggap at paggalang sa kasarian na nagtataguyod ng pagkakapantay-pantay ng tao bilang kasapi ng pamayanan.	• Nasusuri ang mga layunin at probisyon ng Republic Act 9262 (Anti-VAWC Act) at Republic Act 9710 (Magna Carta for Women). • Nakatutukoy at nakapagsusuri ng mga kongkretong senaryo o sitwasyon kung saan nalabag o naipaglaban ang mga batas na ito. • Napahahalagahan ang papel ng pambansang batas at mga institusyon ng pamahalaan sa pagprotekta sa kababaihan at kanilang mga anak laban sa karahasan at sa pagtataguyod ng dignidad, karapatan, at pagkakapantay-pantay. • Nakagagawa ang mga maga-aral ng hakbang na

				nagsusulong ng pagtanggap at paggalang sa kasarian sa pamamagitan ng pagbuo ng isang malikhaing advocacy plan, nabibigyang-katwiran sa pamamagitan ng SDG 5, 10, at 16.
Group 2- Kenn, Lou, Ivan, and Donna	English (linked to Science) - Grade 10	Climate Words, Climate Action: The use of disciplinespecific words, voice, technical terms in research, and the conceptual, operational, and expanded definitions of words	EN10INF-III-3: Analyze the use of discipline-specific words, voice, technical terms in research, and conceptual, operational, and expanded definitions of words.	• Compare the use of discipline-specific words and technical terms in informational and research texts addressing local impacts of global climate change. • Analyze how technical terms, definitions, and academic voice contribute to the clear and precise communication of information about local climate-change impacts. • Extract and synthesize significant information from two climate-related sources to produce a Climate Information Brief on a local impact of global climate change.
Group 3- Aurick, Aldie, Christa, and Michael	Science (linked to TLE) - Science 10	Decoding Chemical Reactions: Recognizing	Describe important types of chemical reactions (combination, decomposition, single replacement, and double replacement).	• Identify the characteristics of combination, decomposition, single replacement, and double replacement reactions.

		Reaction Patterns: Types of Chemical Reactions		• Classify given chemical equations according to the type of chemical reaction. • Explain the importance of the types of chemical reactions in daily life.

14	• shows engaging delivery, clear voice, pleasing personality, and exudes energy and dynamism.	4	4	4				
15	• show good rapport, recognize and appreciate individual and/or group effort, participation and contribution that sustains learners' interest	4	4	4				
16	• demonstrate teamwork, support and cooperation during lesson flow, sequence, pacing, and transitions.	4	4	4				
	Total Score:	60/64	61/64	54/64	/16	Group 1	Group 2	Group 3

Part III. Reflections:

- Please answer the following questions with brief and concise response.

Questions	Group 1	Group 2	Group 3
1. Over-all, how would you describe the : (a) Lesson Plan Write-Up	The lesson plan was strong, well-integrated, and clearly aligned with the competency. It effectively connected Araling Panlipunan with ESP and SDGs 5, and 10 with SMART objectives.	The lesson plan was coherent and well-connected, with varied and interactive activities. It closely followed the 5Es framework, moving from an engaging review to collaborative learning. The integration of English and Science in discussing	The lesson plan was well-organized and showed a good understanding of the content. It had clear objectives on the four types of chemical reactions and effectively integrated Science with TLE.

calal.pnu.edu.ph

		climate change was also clear and purposeful.	
(b) Lesson Delivery /Implementation	The delivery showed confidence and strong command of the content, with a meaningful advocacy focus.	The delivery was engaging and learner-centered. There were engaging activities such as Mentimeter and compare-and-contrast through breakout, and sharing activities made the lesson interactive and enjoyable.	The delivery showed solid content mastery and confidence, but more learner interaction and active participation could have made the delivery more engaging.
2. What are the strong areas/ teaching strategies or techniques which you think is a good practice?	The strongest practices included the clear integration of SDGs and relevant laws, well-defined SMART objectives, and varied assessments that were aligned with the lesson.	The strongest practices were the engaging and varied activities, with each part of the lesson flowing smoothly into the next.	The group demonstrated a strong understanding of the topic and presented the four types of chemical reactions in a clear and organized manner.
3. What are the weak areas you think that need improvement (a) If about the lesson plan write-up , please specify in reference to do Indicators above in the Observation Tool?	The main areas for improvement were the lengthy lesson plan and the teacher-centered delivery. The materials could be made more concise and visual, while the teaching strategies could give learners more opportunities to explore and participate actively.	The main area for improvement time management. Since the lesson went beyond the planned time, some parts were not executed.	The main areas for improvement were limited learner interaction and too much reliance on lecture. Some activity instructions could also have been clearer to avoid confusion.
(b) Please write down your suggestions and/or recommendations	Simplify the slides by using more visuals or short clips, and use interactive tools like Kahoot and breakout rooms to encourage greater learner participation.	Rehearse and set realistic timelines for each part along with its activities.	Provide clearer instructions before each activity and incorporate more interactive strategies to encourage active learner participation. The lesson could also include more real-life

			examples to make the topic more meaningful and relatable.
(c) If about the lesson delivery , please specify.	The delivery was confident and informative, but some parts were teacher-centered. More learner participation and interaction could make the lesson more engaging.	The delivery was interactive and learner-centered, but time management affected the Evaluation stage. More time should be allotted for the assessment and closing activities.	The delivery showed good content knowledge, but it relied heavily on lecture and presentation. Some instructions also needed to be clearer to ensure that learners understood the activities.
(d) Please write down your suggestions/recommendations	Balance teacher explanation with more learner-centered activities, such as discussions, group tasks, and short interactive exercises. This can help maintain participation throughout the lesson.	Manage the time for each activity more strictly and reserve enough time for the Evaluation stage. Keeping activities focused and concise can help ensure that all parts of the lesson are completed.	Use clearer activity instructions and provide more opportunities for learners to participate, discuss, and apply the concepts rather than relying mainly on lecture.

2. What is your overall insights gained from this lesson demonstration and lesson observation activity?

The lesson demonstration and observation helped me realize that effective teaching involves more than having a well-written lesson plan. Clear objectives, appropriate strategies, learner participation, effective time management, and meaningful assessment all need to work together. I also learned that observing other groups provides useful ideas on how to improve lesson delivery, make activities more engaging, and better respond to learners' needs.
